

How old are the players getting the minutes?

2,814 club-seasons from five European leagues, 1996/97–2024/25

Strasbourg's 2024/25 side is the youngest in this dataset.

229 clubs · 29 seasons · domestic league minutes only

Coverage: Premier League, LaLiga, Bundesliga, Serie A and Ligue 1.

Method: $\Sigma(\text{recorded season age} \times \text{league minutes}) \div \Sigma(\text{league minutes})$. At least 25,000 player-minutes per club-season.

Age is the dataset's season value, not age updated on each matchday. Includes goalkeepers; excludes cups and national teams.

Source: Meplar's local Transfermarkt-derived football snapshot. Scope is this file, not an all-time European record.
